NOIDA: Traffic movement on the Delhi-Noida Direct (DND) Flyway – a crucial 9.2-km link between Delhi and Noida – will be affected for the next two months due to major repair and resurfacing work, Noida Traffic Police said on Monday.

The Noida Toll Bridge Company Limited, the concessionaire maintaining the flyway, has begun the phase-2 of its rehabilitation project, with work scheduled between 11pm and 6am and again from noon to 4pm to avoid peak-hour disruptions.

Officials said the Delhi-to-Noida carriageway will be repaired first, followed by the Noida-to-Delhi stretch.

“Maintenance work will be carried out in two shifts to minimise inconvenience during peak hours,” said Pravin Ranjan

What the revamp entails

ROUTE: 9.2-km, 8-lane DND Flyway (Noida - Delhi's Maharani Bagh)

DATE OF START: Nov 10

DURATION: For two months

WORK SCHEDULE

11pm to 6am and 12pm to 4pm

Singh, deputy commissioner of police (traffic), Noida. During these hours, two of the four lanes on the flyway will remain closed, while traffic will move on the remaining two.

The Noida traffic police have advised commuters to use alternative routes for Delhi such as Kalindi Kunj and the Chilla bor-

der to avoid congestion. .

Motorists expressed concern that the partial lane closures would slow down movement, especially in the evenings. Prakash Kumar, a resident of Noida's Sector 20 who drives to Delhi for work, said, “Repairs are necessary, but this flyway is the lifeline for people like us to travel frequently between Noida and Delhi. The work should be completed on time and without major disruption.”

Harsh Singh, another commuter from Sector 55, added, “Even partial closures during the day slow traffic to a crawl. The authorities should make sure the project finishes quickly so normal flow resumes soon.”

The ongoing phase is the second major rehabilitation effort for the DND Flyway, at an estimated cost of ₹6 crore. NTBCL said the phase is expected to be completed by January 2026
